

# HELLO!

## FROM FOO MEE HAR

*Dear Residents of Gek Poh,*

I am pleased to share some updates with you.

In partnership with NEA, we launched the household recycling initiative with the distribution of Blooboxes. Many of the residents were curious about the free home recycling boxes and how they could do their part in recycling. I encourage you to take advantage of the recycling programs available in our community and make a conscious effort to reduce waste. Blooboxes can be requested via the online feedback form on the NEA website or myENV app.

During the month of Ramadan, I was delighted to join volunteers and grassroots leaders in a host of community outreach activities. These included the weekly porridge distribution, where I want to express my deepest gratitude to Hashim and his family for their incredible generosity in preparing a large pot of porridge to be shared among the community. Additionally, we participated in breaking of fast events and organized Hari Raya Festive giveaways to low-income families. Witnessing the unity and compassion within our community during this special month was a heartwarming experience for all involved.

In October 2022, residents of Gek Poh central were invited to the Neighbourhood Renewal Programme (NRP) Preliminary Consultation, where they had the opportunity to view and provide feedback on the preliminary design. Building on this community engagement, the Neighbourhood Renewal Programme (NRP) Public Consultation for Blocks 751-761 and 764-766 Jurong West St 74 took place on 20 & 21 May. It is crucial that residents continue to show their support for the project and actively participate in the Public Consultation. By voicing their opinions and giving their "yes" during the consultation, residents can ensure that their voices are heard and that the NRP plan is tailored to meet their specific needs and preferences.

Let us continue to work together, hand in hand, to make Gek Poh our best home!
